

I beleive this country needs a "dedicated" high speed (above 150MPH) rail service between major metropolitan areas (IE: Boston to New York to Philedelphia to Baltimore to Wash DC(express no intermediate stops), New York to Pittsburg to Chicago, Chicago to St. Louis to Denver to L.A., Denver to Dallas to New Orleans to Tallahassie to Orlando to Miami, New Orleans to Atlanta to Richmond. San Diego to L.A. to San Francisco to Sacremento to Portland to Seattle.) There is a need for effective and efficiant passenger and express package delivery service in the event of future air transportation system failures or terrorist attacks on this country. transportation system.
